New Moody Bible Film To Be Shown

The newest Moody Bible Institute of Science film, "Windows of the Soul" will be shown tonight at 7:30 at 3703 Del Amo Blvd.

This film brings out the wonder and mystery of the senses of sight, hearing, touch, smell and taste and how beautifully these sensory organs are designed to make life possible on this earth. It considers the entire spectrum of electromagnetic and sound waves and reveals that we are almost totally blind and deaf.

Our minds are also prone to err in interpreting sensory information. These things emphasize the folly of basing eternal judgments on what we learn through our senses.

Pastor Stuart Smith will be speaking in the morning service at 11 a.m. The Sunday School hour begins at 9:45 a.m. and the contest for a new Scofield Bible is still going strong. Several of the young people are in close competition. All are invited to attend these services.

against future sales." Adding to revenues in coming months will be a more sophisticated oscilloscope recording camera, about to be introduced by Beattie-Coleman, Inc., a subsidiary. This company is the leading manufacturer of oscilloscope recording cameras

used in laboratories throughout the country. Stepped up sales of magnetic recording tape, a product recently added to Coleman Electronics, Inc., another subsidiary, will also boost sales. During the nine months period, debt was reduced by \$219,200, Coleman noted.
